Array's unique partnership with eClinicalWorks brings proven experience, trust and confidence to the combined solution offering

Array Networks Sales Proposition

Price to performance ratio is extremely attractive

Purpose built appliance on Array's speedstack architecture

APV series has spectrum of options, each providing the optimum balance of features and performance at the right price point for Enterprises and SMB's alike

Only company to offer SSL offloading and SSL Acceleration on the entire APV series of platforms

In depth understanding of application performance, application logic bottlenecks, high availability, server load balancing, SSL offloading and caching functions that dramatically improve overall performance of applications on the network.

Certification Environment

Array Networks Platform

- APV AppVelocity series hardware

eClinicalWorks Platform

- eClinicalWorks 8.0 software with EMR and PM modules

Dell Platform

- 2950 ESX hardware systems running VMWARE

eClinicalWorks Partnership Benefit Highlights

In-depth understanding of eClinicalWorks EMR and PM task flows and processes

Expertise to build cookie-cutter eClinicalWorks solutions based on the size of medical practice networks

Array and eCW engaged each others engineering and support staff to build stable and high performing configurations for superior eClinicalWorks performance

Personalized 24x7 support from Array's certified eCW solution specialists for pre and post deployment issues.

Response Time improvements for EMR and PM clinical task flows and processes in eClinicalWorks with Array APV platform

Lower bars are better

Create Appt, Create Claim and Patient Lookup clinical task flows
